/***** Recent Experience *****/

#!/usr/bin/env Security-Researcher

- > Identified vulnerable open endpoints from the NYU domain and created pentest reports.
- > Conducted research on wireless network attacks such as Deauthentication and Spoofing.
- > Hosted a global capture the flag competition with over 1800+ teams and 4500+ players.
- > Built on-premise and cloud infrastructure with VPN, segmentation, and 2FA/OAuth access.
- > Created observability dashboards to display syslogs, container logs, and host metrics.

#!/usr/bin/env Software-Architect

- > Designed custom CI/CD Jenkins library tailored to Monorepos with 100% code coverage.
- > Reduced CI/CD run time by 20+ minutes by building a remote distributed cache solution.
- > Increased web throughput by 70% with a compressed cache solution by fixing bottlenecks.
- > Implemented highly available failover mechanisms to ensure uninterrupted services.
- > Built a scalable web static page proxy for internal applications and documentation.

#!/usr/bin/env Technology-Lead

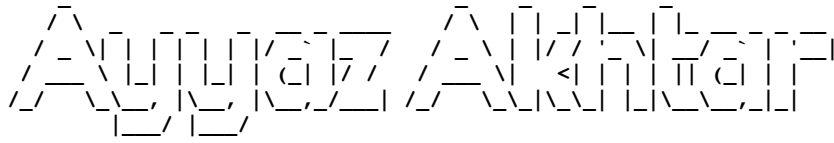

- > Technology lead on Disney+, Star+, ESPN+, and Hulu Web Architecture/Infrastructure.
- > Support developers with debugging, troubleshooting, requirements, and implementation.
- > Monitored roadmap milestones progress to deliver strategic work and adjust priorities.
- > Socialized RFCs to stakeholders and teams to gather feedback and refine requirements.
- > Automated, gathered, and displayed team metrics to support data-driven decision-making.

#!/usr/bin/env Scrum-Master

- > Hosted scrum workshops to teach work breakdown, story/mapping, mob programming, and TDD.
- > Participated in cross-functional working groups to promote cross-organization alignment.
- > Conducted fire drills to identify gaps and improve production incident response.
- > Supervised pairing sessions to foster knowledge sharing, collaboration, and cohesion.
- > Converted technical ideas into engaging demos, ensuring features to stakeholders.

#!/usr/bin/env Open-Sourcerer

- > Maintained a dev.to tech blog with topics on cloud, network, security, and software.
- > Open-sourced an AWS cloud optimization tool to improve cost efficiency and utilization.
- > Contributed and analyzed 400+ JavaScript solutions on neetcode.io as a resource.
